PROFESSIONAL SUMMARY

Frontend-heavy Full-Stack Developer with 4.5+ years developing scalable enterprise web and mobile applications.

EXPERIENCE

Software Engineer

Jan 2024 – Present

Newron – Modern School ERP Startup

Pune, Maharashtra

- Architected the frontend for a multi-role School **ERP** platform serving **15+ institutions**: built the admin panel with React.js and Tailwind CSS (code splitting, lazy loading, WCAG/ARIA compliance) and delivered student, parent, and employee apps using React.js and Material UI wrapped in **React Native** WebView
- Architected a real-time Helpdesk and Ticketing module using **WebSockets (Socket.io)** and a **Node.js** backend, applying **useMemo/useCallback** to prevent re-renders on high-frequency socket updates; processed **100,000+ tickets** in 7 months at a 92% resolution rate, cutting response time from 48 hours to 3 hours (94% faster)
- Built a real-time school bus GPS tracking feature (Node.js backend, Google Maps API) optimised with React.memo across **50+ live bus markers**, reducing parent inquiry calls by 78%; also built data-intensive admin dashboards (React, ApexCharts) backed by optimised PostgreSQL queries, cutting admin overhead by 89% across 15+ institutions
- Implemented **JWT-based authentication** and role-based access control with **Jest/React Testing Library** coverage for critical auth flows; deployed via **AWS S3, CloudFront, and EC2 with CI/CD pipelines** and Git Flow reviews
- Integrated **HDFC, Razorpay, and PayU** payment gateways via **RESTful APIs** with automated reconciliation workflows

Frontend Developer

Feb 2022 – Oct 2023

Qdegrees Services

Jaipur, Rajasthan

- Led frontend development of a building-materials **e-commerce** platform using Next.js and React.js with Material UI, **covering 45+ product categories** from initial project setup through production launch, with lazy-loaded images and route-based code splitting
- Implemented server-side rendering (**SSR**) and static site generation (**SSG**) in **Next.js**, improving Core Web Vitals scores, organic search rankings, and page load times
- Collaborated with the **Python** backend team to integrate REST APIs across product listings, **inventory**, user sessions, and checkout flows; deployed builds via **Microsoft Azure Static Web Apps** with **Azure Blob Storage** for CDN delivery
- Built buyer and seller onboarding flows with dynamic form validations and conditional logic, improving conversion; managed async workflows for inventory sync, filtering, and pagination using **Redux Saga** and **Redux Toolkit**, with **Jest unit tests** for reducers and selectors

SKILLS

Frontend : React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Redux Saga, Context API, HTML5, CSS3, Tailwind CSS, Material UI, Ant Design

Mobile : React Native, React Native WebView (Student, Parent, Employee apps)

Backend : Node.js, Python, FastAPI, REST API Design, GraphQL, JWT Auth, OAuth 2.0

Cloud & DevOps : AWS (S3, CloudFront, EC2), Microsoft Azure (Static Web Apps, Blob Storage), CI/CD Pipelines, Docker, Git, GitHub, GitLab, Webpack, Agile/Scrum

Databases : PostgreSQL, MongoDB, Redis, Query Optimization, Data Modelling

Performance & Testing : Code Splitting, Lazy Loading (React.lazy/Suspense), React.memo, useMemo, useCallback, WCAG 2.1, ARIA, Core Web Vitals, Jest, Unit Testing, React Testing Library

EDUCATION

B.Tech in Information Technology

2015 – 2019

Government Engineering College

Bikaner, Rajasthan
